CITRUS INDUSTRY IN GRAVE DANGER

Democrats as Part of Tariff Revision Scheme Figure on Taking Off Protection From Oranges and Lemons. Southern California Growers Appear Before Committee to Enter Protest.

By Associated Press.

WASHINGTON, Jan. 20.—Free lemons or at least a fifty percent cut in the present duty to one and one half cents a pound assumed shape today as part of the Democratic tariff revision policy.

Most of the testimony before the Committee on ways and means at three sessions today and tonight while on the general subject of the agricultural schedule bore on citrus products, an industry that represents a two hundred million dollar investment on the Pacific Coast.

The Citrus Protective League of California, comprising the growers and shippers of oranges and lemons, and the Fruit Growers' Exchange

which Representative Underwood insisted was the selling agency of these producers, contended for a retention of the duty. Their spokesman was G. H. Powell of Los Angeles.

The New York Fruit Exchange, comprising jobbers, importers, commission merchants and brokers demanded the elimination of the lemon tariff. Its spokesman was Eugene M. Travis. He claimed the California industry "had enjoyed abnormal profits" and declared it the beneficiary and undue taxation on a household necessity. Underwood favors putting lemons on the free list while some members are figuring three quarters of a cent a pound as a fair compromise.
